Hi,

We continue preparing GDL workshop to happen on Meudon Campus of Paris Observatory in June 2014 from Tuesday 10 to Friday 13
<http://cias.obspm.fr/fr/activities/details.php?id=103>

No registration fees, but please inform me by email if you plan to attend, in order to fix various points (meal, coffee break, access code and maps, network access ... and room size !!)

program:

Tuesday 10 and Friday 13 devoted to GDL: general presentation, discussion, help for compilation from scratch, roadmap elaboration, activities on MS-win ports, bugs tracking and correction, documentation ...

Wednesday 12 at 11am:

talk by G. Guennebaud (Inria) one of the core contributor of Eigen3
<http://eigen.tuxfamily.org>

(If you plan to come, and don't speak French, please write me ASAP because we are still discussing if it is better to have a talk in French or in English)

Thursday 13 devoted to Yorick, GPU and community.

(general organization: morning starting at 9h30 : talks, afternoon : end of talk if needed and install party, coding, ... This a workshop, not a conf')

Yes it is free but it is much better to "register" in order to help us for organizing, if you plan to come, please send me an email (meals, coffee breaks, access codes, and other details)

(5 of the 6 most active contributors already confirm to attend)

More details to come.

Alain
