Hi,
I am using a function called "spheretool.pro" for my University research <
link:<http://physics.nyu.edu/grierlab/software/spheretool.pro> >

. In this function contains a sub function called circ. I am having trouble defining the function as I cannot find the code online. Did the name get changed to something else (circle.pro)? Anyone have any idea on what it is and where I can get the code?

Thank you in advance!
Nitsorn
