
Subject: legend() with symbols

Hi All

Is there any way to change the behaviour of legend() when using symbols in a plot? For example, the following code produces a legend, but the legend text is preceded by three '+' symbols, instead of the more traditional single '+'. While the output is not incorrect, it does look a little odd.

```
lp1 = plot(findgen(10), NAME='Test', LINESTYLE='None', SYMBOL='+')
lg1 = legend(TARGET=lp1, POSITION=[0.1,0.9], HORIZONTAL_ALIGNMENT='LEFT', $
    /RELATIVE)
```

Gordon
