Subject: Delete element from the structure inside another structure
Posted by Andrii on Sun, 06 Jul 2014 23:37:35 GMT

Hello everybody!

I'd like to ask you about one thing which is generally already discussed in other groups.

But my question is a bit more specific.

I have a structure inside another structure like this one:

 a = { f1: 0, f2: { x: FltArr(10,10,10), y: 0}}

My question is, how can I delete just an array x, or to replace an array x with the array y = FltArr(5,5,5)?

Thank you!
