Hi Greg,

I don't use Photoshop. Therefore I don't know, how Photoshop creates and reads "multi-layer TIFFs". You may try to create a multi-image TIFF file in the following way:

```
a=bytsc1(dist(400))
b=bytsc1(findgen(400,400))
write_tiff,"test.tif",a
write_tiff,"test.tif",b,/append
```

I don't know, if this works.

Cheers, Heinz
