Try plotting only the points that have non-NaN values.

```
iGood = where(finite(lon2500[3,*]) and finite(lat2500[3,*]), nGood)
if nGood gt 0 then cgplots, lon2500[3,iGood], lat2500[3,iGood], map=mapCoord, color='green',
thick=4
```

etc.
