---

I have been able to read in several NetCDF files, and now I am attempting to create Hovmoller diagrams, but cannot get the data to cooperate with me. The data is as follows:

temp=[2000,2000, 2]

lon=[2000,2000,2]

lat=[2000,2000,2]

time=[2]

Any suggestions on how to create these plots would be much appreciated.

Thanks
