I just thought I'd let everyone know....

There is finally a BBS Software with all of the great features of OBV/2 and Iniquity, but without the bugs and bad

support. Infusion BBS Software is a new generation in BBS Software, modeled after OBV/2 and Iniquity with everything that the sysop can imagine..and more.

Some basic features are:

- o Multi-node upto 255 concurrent users
- o Light-bar support [arrow keys]
- o Requires NO Fossil Driver [selectable FOSSIL, ASYNC, and Digiboard for each node]
- o Online Configuration [menu editor, string editor, event editor, node editor, system editor, etc]
- o Pipe Color Codes
- o MCI Codes
- o Powerful scripting language
- o Internal One-Liners, Blacklist, voting booth, etc
- o Internal Z-Modem, X-Modem, Y-Modem, Y-modem-g [no limit to external protocols]
- o Internal COMM Program with internal protocols, Auto Up/DL
- o Great support
- o Basically all of the great features of OBV/2 and Iniquity combined

Infusion has been picked up by fuEl [international art group], and Infusion 1.0th will be released June 10th.

Come to the Infusion Home-Page at <http://web.wt.net/~sparky/ibbs/> and jump into the JAVA Based Chatroom,
or come to the ANNEX, the official Infusion IRC Server [irc.annex.net] #infusion / #bbs

send the author skaboy101 [Grant Passmore] E-mail at skaboy@usa.net
