
Subject: Axis units outside the page boundary when using PS_star

Hello,

I am trying to plot few histograms into an eps, into the same reference axes with the code given below, but the x-axis label goes out of the page.

Is there any way that I can fix it without changing font size or YSIZE?

Thanks in advance.

Regards

```
PS_Start, /encapsulated, FILENAME = 'NGC1386_vel_distribution.eps', FONT = -1
fits_read, 'file1.fits', vn
cgHistoplot, vn, BIN=10, /FREQUENCY, COLOR = 'black', /OUTLINE, $
XRANGE = [xrl,xrh], YRANGE = [yrl,yrh], XTITLE = 'km ' + TexToIDL('s^{-1}')
```

```
fits_read, 'file2.fits', vbb
cgHistoplot, vbb[w2], BIN=10, /FREQUENCY, COLOR = 'blue', /OPLOT, $
/OUTLINE, OL_STYLE = 3, LINE_THICK = 6
```

```
fits_read, 'file2.fits', vbr
cgHistoplot, vbr[w3], BIN=10, /FREQUENCY, COLOR = 'red', linestyle = 2, /oplot, /OUTLINE,
OL_STYLE = 2
PS_END
```
