```

Typo. Should be

```
;List  
myList = list()  
myList -> Add, fltarr(nc, nr)  
myList -> Add, fltarr(nc, nr)
```

I suppose you could also create a hash

```
;Hash  
myHash = hash()  
myHash('Key1') = fltarr(nc, nr)  
myHash('Key2') = fltarr(nc, nr)
```
