Some of the new features I have wanted for a very long time: filter, map and reduce for hashes and lists, list sort (with user-selectable comparison function), generatecode,lambda functions, variable attributes.

Thanks for the kind words! Please post here when you do exciting and cool things with the new features. I'm always interested in hearing about how people are using IDL, what kinds of data are being analyzed, different types of visualizations, etc. That's what keeps me coming into work every day. :-)
