I am trying to call a DLL using Call_External under Win95, and I am running into difficulties. I am using IDL 4.0, Visual C++ v5, and the test DLL found in RSI\IDL40\external\sharelib named DllTst.

I am compiling the DLL and getting this message:

Linking...

Creating library Debug/DllTst.lib and object Debug/DllTst.exp

DllTst.exp : warning LNK4070: /OUT:dlltst32.dll directive in .EXP differs from output filename "Debug/DllTst.dll"; ignoring directive

which I assume can be safely ignored. I then Call_External in IDL only to get this message:

IDL> dlltst32

This program tests CALL_EXTERNAL using DLLTST32.DLL

% CALL_EXTERNAL: Error loading DLL dlltst32.dll, LoadLibrary() error 6549692.

% Execution halted at: DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% DLLTST32 9

c:\rsi\idl40\external\examples\sharelib\dlltst32.pro

% \$MAIN\$

Does anyone know what is causing this error? (Note: I am letting the VC++ environment take care of the .MAK file info, is this the problem?)

Any help would be appreciated.

Rob
