After much delay mostly in writing the documentation, version 2.00 of the
XY plotting package GRAFFER is now available.

For more information see http://www.sr.bham.ac.uk/~sjt/graffer/
To get a copy file://ftp.sr.bham.ac.uk/pub/sjt/graffer-2.00.tar.gz

To run GRAFFER you need version 4.0.1 of IDL or higher and support for
widgets.

Version 1 files can be read by version 2, however the V2 file format is
entirely different and it should now be easier to maintain compatibility
of new versions of the software with old files.

There are plenty of new bells & whistles to encourage you to update:
- Some support for 2-D datasets and functions
- Options to add a key to the plot.
- More plot symbols
- Much improved time-labelling of axes
- More control of the size and location of PostScript output on the page.
and more.
