Subject: Fortran, LINKNLOAD and PV-WAVE....
Posted by craigj on Tue, 30 Mar 1993 16:29:32 GMT

Is there a way to call Fortran code using LINKNLOAD in
PV-WAVE?? I have tried it and I could not seem to get
it working. I have also tried writing a C program that
can be called from PV-WAVE which would then call the
Fortran program. That did not seem to work either.

I have some ideas why it would not work but am curious
what others know...

Any ideas would be greatly appreciated.

If this is in an FAQ somewhere or has been discussed
here before, I apologize. If e-mail is more applicable
for this type of question then please e-mail me.

Thanks,

Craig.
