
Subject: How to use BUTTON in CW_FORM?

Hello everybody!

My question is the next:

I used here an example from exelisvis website about the CW_FORM.

```
desc = [ $  
  '0, LABEL, Centered Label, CENTER', $  
  '1, BASE,, ROW, FRAME', $  
  '0, BUTTON, B1|B2|B3, LABEL_TOP=Nonexclusive:', $  
  + 'COLUMN, TAG=bg1', $  
  '2, BUTTON, E1|E2|E2, EXCLUSIVE,LABEL_TOP=Exclusive:', $  
  + 'COLUMN,TAG=bg2', $  
  '0, INTEGER, 0, LABEL_LEFT=File_id:, WIDTH=6,' $  
  + 'TAG=fid', $  
  '0, INTEGER, 0, LABEL_LEFT=File size:, WIDTH=6, TAG=fsize', $  
  '1, BASE,, ROW', $  
  '0, BUTTON, OK, QUIT,' $  
  + 'TAG=OK', $  
  '2, BUTTON, Cancel, QUIT']
```

```
a = CW_FORM(desc, /COLUMN)
```

I would like to do the next: instead of Cancel button I want to put button "Change". Every time when I push this button the value of fields with the label "File_id" and "File size" has to be changed to, for example 5 and 10 respectively and the new values have to be visualized.

As I understood I have to write something like '2, BUTTON, Change, EVENT=Change_value' where Change_value - some function that will perform these changes.

Thank you in advance!
