Hello

I was wondering if there were any ENVI users out there who might be able to give me some advice (ENVI is a tool developed on top of IDL).

I have an image which I am overlapping with "Regions of Interest" polygons. It is possible to save the regions in a .roi file, but does anyone know if it is possible to save the Regions of Interest as a *.tif file (or something that can be converted to a tiff file). Specifically, I need the regions of interest saved, WITHOUT the background image.

any help would be great,
-Will
