Thanks for your suggestions I will take a look. Just to double check my code

Instead of this IF statement:

```
IF (TOTAL(Barray LT 0)) GT 0 THEN NEW_DATA[* ,i,j] = Mean[i,j] $  
    ELSE NEW_DATA[* ,i,j] = Mean[i,j] + OTHER
```

Replace it by this:

```
NEW_DATA[* ,j,k] >= Mean[j,k] $
```

Still doing the same thing right?
