Hi everyone, i am not overly familiar with mac & linux, i try to install IDL 8.4 & ENVI 5.2 by typing -sudo install.sh. After entering the directory to install like (/usr/local/exelis) then the install.sh gives error as follow

You must select at least one product. Continue? (y/n): y
./install.sh: line 401: [: /Users/gokhan/Desktop/EXELIS: binary operator expected
./install.sh: line 408: [: /Users/gokhan/Desktop/EXELIS: binary operator expected

You must select at least one product. Continue? (y/n): n

what is the problem here?
