Now this is probably a simple and quick problem for someone with experience. I think I may have missed the point or fallen victim to a problem with an obvious solution.

=====

```
IDL> a = INDGEN(10)
```

```
IDL> b = [0,10]
```

```
IDL> print, a[b]
```

```
0    9
```

```
IDL> b = [0,9]
```

```
IDL> print, a[b]
```

```
0    9
```

=====

Why?!

David B
