Hi nata (and Wayne!),

It's still going to be a few months before IDL 8.5. We're just releasing a service pack (8.4.1) now. But like Wayne said, IDL 8.4 works fine with Yosemite. I've been using it at home ever since Yosemite came out, and haven't run into any issues. There are a *lot* of new features in 8.4, so at least in my very-biased opinion, it's worth upgrading now. :-)

Cheers,
Chris
