> Yeah XPA can work with fits and I was passing the data back and forth that way. It just still seemed strange that I had to write the fits file only to read it elsewhere. I was more or less fine with this, until I saw that someone cracked this in Python. Meaning, they managed to send the data to XPA and then ds9 by passing it through XPA's stdin and not using cat. From looking at their code, it seemed the feature I was missing was numpy.tostring()...

What does the Python code look like?

-C
