Hi,
this the error>

IDL> cd, 'C:\Documents and Settings\Dave\Desktop\data2\test\ENEA_lidar'
IDL> enea
% Compiled module: ENEA.
% Variable is undefined: DEBUG.

this a widget for reading and plotting laser data. i read some *.txt files, and and do some analysis, and then plotting. i have run this code on idl 7 but now that i have idl 8.0, this error is coming up.
Cheers,
