Another possibility is that you want to reform your array to be 400x1, then copy it 100 times, so that you have a 100x400. In this case, you want

```
IDL> A = randomu(s, 200, 200)
IDL> A = rebin(reform(A, 1, 400), 100, 400)
```
