Hello All,

I need basic help on map projection showing United State

Latitude range [25N , 50N]

longitude range [190E , 310E]

I tried as follow but the map is stretched

```
cgMAP_SET, /MERCATOR, /GRID, /CONTINENT, $  
  POSITION=[0.025, 0.0, 0.525, 0.8], $  
  LIMIT =[25,190,50,310], /NOERASE, /NOBORDER
```

I also tried other projections : CYLINDRICAL

Best wishes
