Subject: Remote Procedure Call (Under 3.0? Under VMS?) Posted by youngm on Wed, 24 Mar 1993 19:15:35 GMT

Hi. I need to use IDL to call a library of C routines.

I have looked at the 1992 IDL RPC doccument, and I was wondering:

- (1) Does RPC differ between Unix and VMS? In particular, are there separate doccuments? (The RPC manual I have doesn't say).
- (2) Does RPC differ under version 3.0 of IDL?
- (3) The IDL RPC doccument mentions an RPC directory. My (VMS) site doesn't have this directory. Should it?

Thanks very much for your help!
