Subject: 3d polygon mesh for 3 independent variables x,y,z

Hi,
I am a new in IDL. And I need some help.
I have 3 independent variables. I plotted 3d polygon in MATLAB using 'convhull' and then 'trimesh'
precedures. But I have to do in IDL. I already plotted a 3d scatter plot using 'plot3d' and then I go
for 'qhull' for the delaunay triangulation. However, I am not able to plot the (bound) polygon mesh
in my 3d plot. Or, is this triangulation not the way I should look for?
If anyone can help how to plot such a 3d-polygon, that will be a nice pleasure.
Thanks in advance,
Guni
