
Subject: IMSL won't load

Hi everyone,

I recently added the Analyst license to give me access to the IMSL routines. However, when I try to use them I get this error:

```
% MATHSTAT_135: Dynamically loadable module is unavailable on this platform:
      IMSL.
```

The license server does seem to see the license -- at least, I see this when I use linstat:

Users of idl_analyst: (Total of 1 license issued; Total of 0 licenses in use)

Any ideas?

-Jeremy.
