Subject: Draw a circle enclosed to the other

Posted by g.nacarts on Thu, 26 Mar 2015 12:33:20 GMT

Hi

I wanted to create two circles where the one enclosed to the other and I found the circle function which creates circles. What I want is the green and yellow circle as shown in the following page.

https://www.idlcoyote.com/tips/make_circle.html

For some reason I copy paste the whole code

```
TVLCT, [255,0], [255,255], [0,0], 1
POLYFILL, CIRCLE(65, 65, 20), Color=1, /Device
PLOTS, CIRCLE(130, 130, 30), /Device
PLOTS, CIRCLE(195, 195, 20), /Device, Color=2
PLOTS, CIRCLE(195, 195, 10), /Device, Color=1
```

But I am ending up only with the white circle created by PLOTS, CIRCLE(130, 130, 30), /Device.

Can anyone help with this?
