Looks like it works perfectly to me. Here is the code I used to test it on my Windows machine:

```
cgPS_Open, 'test.ps'  
  ticks=loglevels([30,4000],/Fine)  
  nticks = n_elements(ticks)  
  cgColorbar,Range=[30,4000],Position=[0.15, 0.85, 0.9, 0.93],$  
  /ylog,/vertical,yticks=nticks-1,ytickv=ticks,$  
  charsize=3,/right,textthick=4  
cgPS_Close  
END
```

Have you updated your Coyote Library lately?
