Does anybody know if the extremely well-written program that David
mentions is still accessible anywhere?

It seems the original announcement of this code was made in the
official support forum
 http://www.exelisvis.com/Support/Forums/tabid/184/forumid/7/
postid/10939/scope/posts/Default.aspx
but the only link given there is so old that it is still at ittvis.com.

Searching the exelis website yields links to the venerated
cgTaylorDiagram, but I am very much hoping to find the IDL 8 functions
graphic version. Any suggestions would be greatly appreciated!

Thanks,
Paul
