Yes. Sorry for assuming that Windows users don't use the command line.

So now I've tried it from the command line on my Linux system

{ x86_64 linux unix linux 8.4 Sep 27 2014 64 64 }

and I *don't* see the *Illegal operand* error.

Thus, I have only seen the problem from my Mac, so far. Maybe there is something wrong with my X-windows setup (though I don't notice any other problems). --Wayne
