"file_dirs" includes the full path to every folder that I want the data to be copied to. Still something
wrong with the code?
>>>
>>> file_dirs = FILE_SEARCH(mydir, /TEST_DIRECTORY)
>>> myfile = DIALOG PICKFILE(Title='Select myfile: ')
>>> FOR i=0, N_ELEMENTS(file_dirs)-1 do begin
       cmd = 'cp ' + myfile + " + file_dirs[k]
       print, cmd
>>>
       spawn, cmd
>>>
>>> ENDFOR
>>
>> You may want to use the loop variable when indexing file_dirs, rather than the undefined (?)
variable k.
> Oh I forgot to change that but if I do, it doesn't change anything...
```

I executed those lines by marking it and executing it with "Shift + F8". After compiling it it worked out well.

Thanks for your help anyway!

Ok everyone, I got it.... That's a stupid one;)
