Subject: I am missing plot.pro
Posted by Cibi Raj on Tue, 26 May 2015 16:41:04 GMT

Hello all,

I am missing plot.pro in my idl libraries. but when I enter IDL through Terminal, it says,

NOTE FOR RedHat Enterprise USERS: Some functionality in this IDL release requires the libstdc++
 compatiblity libraries to be installed. To check if the libraries
 are already installed, execute 'rpm -qa | grep compat', and look for
 "compat-libstdc++-<version_number>". If this is not listed, install
 the appropriate RPM for your distribution (from your install CD's).

Could it be because of this ? I am new to linux and programming itself. Can you please help me
with that ?
