Hey!

I'd like to list my files and write them into a text file. Each filename should be in a separate line....  
Shouldn't be to hard ;)

This is what I have:

```
PRO test
cd, 'Path of my files'
files_all = FILE_SEARCH()
openw,lun1,'fileinfo.txt', /get_lun
printf, lun1, files_all, FORMAT='(A)'
close, lun1
free_lun,lun1
END
```

I couldn't find any suitable command till now...

Thanks!
