Hey!

I'd like to list my files and write them into a text file. Each filename should be in a separate line....
Shouldn't be to hard ;)

This is what I have:

```
PRO test
  cd, 'Path of my files'
  files_all = FILE_SEARCH()
  openw, lun1, 'fileinfo.txt', /get_lun
  printf, lun1, files_all, FORMAT='(A)'
  close, lun1
  free_lun, lun1
END
```

I couldn't find any suitable command till now...

Thanks!
