This should suffice;

PRO test

```
cd, 'Path of my files'  
files_all = FILE_SEARCH()  
openw,lun1,'fileinfo.txt', /get_lun  
FOR i = 0, N_ELEMENTS(files_all) DO $  
  printf, lun1, files_all[i]  
  free_lun,lun1  
END
```

Try

help, files\_all

it's an array
