HI,
I am trying to print some long integers, double values in a file using PRINTF command but in the file some values are pushed to next line. Does anyone has any idea how to suppress it from jumping to new line?

```
IDL> openw,3,'test.txt'
IDL> printf,3,10.d,9.d,10.d,10.d,10.d,10.d,20.098d,15.d,17.d,2.d, 18.d,34.d      IDL> close,3
```

```
=====
=====
OUTPUT
 10.000000    9.0000000    10.000000    10.000000    10.000000
 10.000000    20.098000    15.000000    17.000000    2.0000000
 10.000000    9.0000000    10.000000    10.000000    10.000000
 10.000000    20.098000    15.000000    17.000000    2.0000000
 18.000000    34.000000
```

```
=====
=====
```

After every 5 elements next elements jumps to a new line. I want all values to be in one line only.
Any ideas?

Vaibhav
