Something that I don't understand. I tried to avoid the for loop created before and I replace this part of the code:

```
for i=0,n-1 do begin  
IF floats_equal(A[i],0) THEN RETURN,[0,0]  
endfor
```

By this:

```
IF norm(A) EQ 0 THEN RETURN, [0,0]
```

I thought I will end up with the same result but I didn't. Does anyone know why this happen?
