
Subject: Changing a Plot's Resolution

Hi everyone.

I know there are ways to set the resolution for a plot in IDL when you are writing it into a PNG or PS file, but I am using plot3d (p = plot3d(x,y,z, '4.')) and can't write it into either of the above formats, and thus can't change its resolution. Any idea how I can do that?

Thanks,
Maryam
