
Subject: Writing float array to file

Hey there!

I have a quite simple problem but I didn't find a solution yet.

Given a float array with the dimensions 2048*5492 ("variables[0]"), I want to put these files in a .csv-file...

This is what I have:

```
b1=foldername[f]+'b1.csv'  
OPENW,1,b1  
PRINTF,variables[0]  
CLOSE,1
```

The error I get is:

PRINTF: Expression must be a scalar or 1 element array in this context: <FLOAT Array[2048, 5492]>.

What does it mean?

Thanks
