Subject: Error opening NetCDF - file

Hello!

I am currently working on a time series including multiple NetCDF's. My procedure includes a call to a "read\_netcdf"-script. The first line there is "ncdf\_open".

This is usually no problem but very few files are causing an error here saying 'Unable to open the file "...". (NC\_ERROR=-101)'.

When I try to open these NetCDF's in the BEAM software I get the message 'No appropriate reader found'.

So I guess somethings wrong with the header of these NetCDF's? I have no clue and would be glad if you could help me out here.
