I ended up doing something like this and it looks like it's working fine

```
OPENR,lun,file_name,/GET_LUN
nlines = FILE_LINES(file_name)

array= strarr(1,nlines)
data=[]
line=[]

READF,lun,array
close, /all
for i=0,nlines-1 do begin
  lines=float(strsplit(array(i), /EXTRACT))
  data=[[data],[lines]]
endfor
```
