After upgrading to IDL Version 5. I have encountered the following problem with polyfill on Ultra1 Creator workstation under Solaris 2.5 and in CDE V 1.0:

```
IDL> set_plot,'x'  
IDL> current_x=fltarr(4)  
IDL> current_y=fltarr(4)  
IDL> current_x=[-21.2500,23.7500,23.7500,-21.2500]  
IDL> current_y=[28.7500,28.7500,31.2500,31.2500]  
IDL> map_set,/grid,/continent  
% Compiled module: MAP_SET.  
% Compiled module: CROSSP.  
% Compiled module: MAP_CONTINENTS.  
% Compiled module: MAP_GRID.  
IDL> polyfill,current_x,current_y, color=35,/data  
IDL>
```

polyfill is not producing the straight line!

Am I doing something wrong?

Any comments will be appreciated.

Thank you,
Lena Marshak
