Subject: Re: Error in IDL-Python Bridge
Posted by biophys on Wed, 16 Sep 2015 20:38:53 GMT

hi guys,

With a lot of hope and curiosity I have just tried the python bridge and I see exactly the same
errors under Xubuntu14.04LTS. Tried both anaconda with python 2.7 and 3.4. I can't believe the
python bridge example code in the first page of help document failed with the recommended
python distribution(anaconda). I wonder for those who did succeed which python distro and which
OS were they using.

Bp
