Folks,

Hi,

I have some lon-lat data and when I put them in google earth, I see some shift around few meters. So i add some amount to lon-lat to shift the location that i want. BUT unfortunately the shape of my points are changed :(. I think this is because of curvature and different scales of lon and lat. I just need a bit shift on my data, without degrading of my points. thanks for any kind of help in advance:),

Cheers,

Dave

BTW> my data is looks like this:

1.4243945e+01	4.1163519e+01	9.6166451e-01
1.4240970e+01	4.1163741e+01	5.1939466e-01
1.4222639e+01	4.1165726e+01	9.7572900e-01
1.4234044e+01	4.1163449e+01	1.7582878e+00
1.4223516e+01	4.1164088e+01	9.9535919e-01
