I don't think this bug has been reported here, but it appears the /Xsty keyword to PLOT() wasn't allowed in V8.3

```
IDL> a = plot(indgen(12),indgen(12),/xsty)
% PLOT: Duplicate keyword XSTY in call to: DATAAXES::SETPROPERTY
% Execution halted at: $MAIN$
```

```
IDL> print,!version
{ x86_64 darwin unix Mac OS X 8.3 Nov 15 2013    64    64}
```

The code works fine in V8.4 and V8.5. But some of my users are still using V8.3 --Wayne
