Hello

I have a data set organize by date , and I am plotting over a range of about 3 years.

I want to look at my data to see if there is any trend with time. so I tried to find references to add a trend line, modulation, or an envelope' to my plot, but I couldn't find much.

Has anyone came across a situation like this? it is obviously not a linear trend.

I also tried to look into using FFT may be , but I couldn't inure out if this will help me to my purpose.

I will appreciate any ideas you might have.

Thanks

Luz Maria
