Dear all,

I have an image in a specific range like bellow:

```
cgDisplay, 500, 500
```

```
cgplot,dist(200),xrange=[-300,300],yrange=[-300,300],/nodata
```

```
cgImage, cgDemoData(5), CTIndex=33,AlphaFGPos=[0.128, 0.126, 0.925,0.9],Transparent=20
```

How could i only display the region between xrange=[-100,100] and yrange=[-100,100]? i.e. the axis range show above ranges and image automatically zoom in that region?

Best regards,
