Folks

Hi,

I need to have a format like this:

.....

```
str='$\rho=$'+string(corr)
```

```
subtitle = text(0.24, 0.8, str, /bold,FORMAT='(F5.2)',font_size=12)
```

but it is not working in IDL. it shows like 0.64232, but i need two decimal digits.

Will u pls help?

Best,

Dave
