Hello Everyone,

I am trying to get IDL to run on my Mac OSX (El Capitan). Unfortunately, attempting to start the IDL command line results in an error (see below):

```
==98977==ERROR: AddressSanitizer: heap-buffer-overflow on address 0x621000237500 at pc  
0x000101f8d4cd bp 0x7fff5fbfa910 sp 0x7fff5fbfa0d0  
WRITE of size 24932 at 0x621000237500 thread T0
```

Can someone please shed some light on how to resolve this?

Please let me know what additional information is required how I can gather it.

Thank You,
Sudharshan Saranathan
